General information

Our lamellas are manufactured in our state-of-the-art facility in the Ukraine, equipped with the latest “Neva” technology. This enables us to produce highly accurate end-products. After production, our lamellas are stored in our climate-controlled warehouse in which we take special precautions such as plastic wrapping and bundle strengthening to ensure the safe shipment for all of our products. Although we have standard thickness and widths, of course we can also make your orders custom made.

- Thickness:** The tolerance regarding the thickness of our top layer is $\pm 0,2$ mm, some pieces can be slightly thicker.
- Quality:** The quality of 10% of the lamellas can slightly differ.
- Moisture content:** 6-8%
