General information

This new product line offers a range of benefits tailored to your needs. The pre-planed hit-and-miss production saves you valuable time and increases efficiency, while convenient packaging and a clear quality overview make handling and selection easier than ever.

It also supports greener, more cost-effective transport solutions, helping to reduce your environmental impact and storage costs. With more storage space and consistently high quality, each product maintains stable moisture content, ensuring long-lasting durability and reliability.

Lumber on the picture is a hit-and-miss production.
